DEPARTMENT OF AGRICULTURE,

WASHINGTON, D. C., _____, 186 .

DEAR SIR: The Department of Agriculture having received a donation of a large collection of plants gathered in different States, and desiring to enrich its public *Museum* with the whole Flora of the United States, sends you the Catalogue of the plants presented, and respectfully requests you to contribute native specimens not included therein. As most of our plants are furnished with duplicates, the Department may, if you desire, send you specimens named in the catalogue that are wanting in your collection. By such mutual exchanges the Department undoubtedly will receive many duplicates, some of which may be also wanting in your *Herbarium*. In giving notice of them they can be sent to you.

By attending to this request the Agricultural Department will, in a few years, have in its public Museum samples of reference from the mineral, vegetable, and animal kingdoms wherewith to promote scientific and useful knowledge and advance the agricultural interests of our common country.

Respectfully, yours,

ISAAC NEWTON,

Commissioner of the Dept. of Agriculture,
